

**D. Equipment** – List nonexpendable items that are to be purchased. Nonexpendable equipment is tangible property having a useful life of more than two years and an acquisition cost of \$5,000 or more per unit. (**Note:** Organization’s own capitalization policy may be used for items costing less than \$5,000). Expendable items should be included either in the “Supplies” category or in the “Other Costs” category. Applicants should analyze the cost benefits of purchasing versus leasing equipment, especially high cost items and those subject to rapid technical advances. Rented or leased equipment costs should be listed in the “Consultants/Contracts” category. Explain how the equipment is necessary for the success of the project. Attach a narrative describing the procurement method to be used.
